AI and the Singularity Robert K Logan
2020-08-31 "AI and the Technological Singularity: A Fallacy or a Great Opportunity" is a collection of essays that addresses the question of whether the technological singularity-the notion that AI-

based computers can program the next generation of AI-based computers until a singularity is achieved, where an AI-based computer can exceed human intelligence-is a fallacy or a great opportunity. The group of scholars that address this question have a variety of positions on the singularity, ranging from advocates to skeptics. No conclusion can be reached, as the development of artificial intelligence is still in its infancy, and there is much wishful thinking and imagination in this issue rather than trustworthy data. The reader will find a cogent summary of the issues faced by researchers who are working to develop the field of artificial intelligence and, in particular, artificial general intelligence. The only conclusion that can be reached is that there exists a variety of well-argued positions as to where AI research is headed.

Witch, Warlock, and Magician W H Davenport Adams
2020-01-25 On mentioning this circumstance to his visitor, he explained that the powder should have been enclosed in wax before it was thrown into the molten lead, to prevent the fumes of the lead from affecting it. He added that he would come back next day, and show

him how to make the projection; but as he failed to appear, Helvetius, in the presence of his wife and son, put six drachms of lead into a crucible, and as soon as the lead was melted, flung into it the atoms of powder given to him by his mysterious visitor, having first rolled them up in a little ball of wax. At the end of a quarter of an hour he found the lead transmuted (so he avers) into gold. Its colour at first was a deep green; but the mixture, when poured into a conical vessel, turned blood-red, and, after cooling, acquired the true tint of gold. A goldsmith who examined it pronounced it to be genuine. Helvetius requested Purelius, the keeper of the Dutch Mint, to test its value; and two drachms, after being exposed to aquafortis, were found to have increased a couple of scruples in weight—an increase doubtlessly owing to the silver, which still remained enveloped in the gold, despite the action of the aquafortis.

Making Hard Decisions with

DecisionTools Robert Taylor Clemen 2001 MAKING HARD DECISIONS WITH DECISIONTOOLS® is a special version of Bob Clemen's best-selling text, MAKING HARD DECISIONS. This straight-forward book teaches the fundamental ideas of decision analysis, without an overly technical explanation of the mathematics used in management science. This new version incorporates and implements the powerful DecisionTools® by Palisade Corporation, the world's leading toolkit for risk and decision analysis. At the end of each chapter, topics are illustrated with step-by-step instructions for DecisionTools®. This new version makes the text more useful and relevant to students to business and engineering.

The Black Musician and the White City Amy Absher 2014-06-16 Amy Absher's *The Black Musician and the White City* tells the story of African American musicians in Chicago during the mid-twentieth century. While depicting the segregated city before World War II, Absher traces the migration of black

musicians, both men and women and both classical and vernacular performers, from the American South to Chicago during the 1930s to 1950s. Absher's work diverges from existing studies in three ways: First, she takes the history beyond the study of jazz and blues by examining the significant role that classically trained black musicians played in building the Chicago South Side community. By acknowledging the presence and importance of classical musicians, Absher argues that black migrants in Chicago had diverse education and economic backgrounds but found common cause in the city's music community. Second, Absher brings numerous maps to the history, illustrating the relationship between Chicago's physical lines of segregation and the geography of black music in the city over the years. Third, Absher's use of archival sources is both extensive and original, drawing on manuscript and oral history collections at the Center for Black Music Research in Chicago, Columbia University, Rutgers's Institute of Jazz Studies, and Tulane's Hogan Jazz Archive. By approaching the Chicago black musical community from these previously untapped angles, Absher offers a history that goes beyond the retelling of the achievements of the famous musicians by discussing musicians as a group. In *The Black Musician and the White City*, black musicians are the leading actors, thinkers, organizers, and critics of their own story. *Understanding Business and Personal Law, Student Edition* McGraw-Hill 1992-07-01 The Politics of Trade and Industrial Policy in Africa Charles Chukwuma Soludo 2004 This book maps the process and political economy of policy making in Africa. It's focus on trade and industrial policy makes it unique and it will appeal to students and academics in economics, political economy, political science and African studies. Detailed case studies help the reader to understand how the process and motivation behind policy decisions can vary from country to country depending on the form of government, ethnicity and nationality and other social factors.

This Wound Is a World Billy-Ray Belcourt 2019-09-03 The new edition of a prize-winning memoir-in-poems, a meditation on life as a queer Indigenous man—available for the first time in the United States “i am one of those hopeless romantics who wants every blowjob to be transformative.” Billy-Ray Belcourt’s debut poetry collection, *This Wound Is a World*, is “a prayer against breaking,” writes trans Anishinaabe and Métis poet Gwen Benaway. “By way of an expansive poetic grace, Belcourt merges a soft beauty with the hardness of colonization to shape a love song that dances Indigenous bodies back into being. This book is what we’ve been waiting for.” Part manifesto, part memoir, *This Wound Is a World* is an invitation to “cut a hole in the sky / to world inside.” Belcourt issues a call to turn to love and sex to understand how Indigenous peoples shoulder their sadness and pain without giving up on the future. His poems upset genre and play with form, scavenging for a decolonial kind of heaven where “everyone is at least a little gay.” Presented here with several additional poems, this prize-winning collection pursues fresh directions for queer and decolonial theory as it opens uncharted paths for Indigenous poetry in North America. It is theory that sings, poetry that marshals experience in the service of a larger critique of the coloniality of the present and the tyranny of sexual and racial norms.

Studies in Motion

Kevin Kerr 2014-01-12 The stop-motion sequences of pioneer photographer Eadweard Muybridge captured the moving body on film for the first time and laid the foundation for modern cinema. Yet the man behind the camera lived a life filled with Victorian melodrama: infidelity, jealousy, betrayal, murder, and an abandoned child. Tried for murder after killing his wife's lover, he was acquitted on the basis of justifiable homicide. Those events, which predate his subsequent obsession with stopping time and freezing motion, become the ghosts that haunt Muybridge in the fictional world of Governor General's Award-winning dramatist Kevin Kerr's play, *Studies in Motion*. Cast of 4 women and 8 men.

The Art of Leaving

Ayelet Tsabari 2019-02-19 WINNER OF THE CANADIAN JEWISH LITERARY AWARD FOR MEMOIR FINALIST FOR THE HILARY WESTON WRITERS' TRUST PRIZE FOR NONFICTION An unforgettable memoir about a young woman who tries to outrun loss, but eventually finds a way home. Ayelet Tsabari was 21 years old the first time she left Tel Aviv with no plans to return. Restless after two turbulent

mandatory years in the Israel Defense Forces, Tsabari longed to get away. It was not the never-ending conflict that drove her, but the grief that had shaken the foundations of her home. The loss of Tsabari's beloved father in years past had left her alienated and exiled within her own large Yemeni family and at odds with her Mizrahi identity. By leaving, she would be free to reinvent herself and to rewrite her own story. For nearly a decade, Tsabari travelled, through India, Europe, the US and Canada, as though her life might go stagnant without perpetual motion. She moved fast and often because—as in the Intifada—it was safer to keep going than to stand still. Soon the act of leaving—jobs, friends and relationships—came to feel most like home. But a series of dramatic events forced Tsabari to examine her choices and her feelings of longing and displacement. By periodically returning to Israel, Tsabari began to examine her Jewish-Yemeni background and the Mizrahi identity she had once rejected, as well as unearthing a family history that had been untold for years. What she found resonated deeply with her own immigrant experience and struggles with new motherhood. Beautifully written, frank and poignant, *The Art of Leaving* is a courageous coming-of-age story that reflects on identity and belonging and that explores themes of family and home—both inherited and chosen.

OLD STOCK HANNAH. CAPLAN MOSCOVITCH (BEN. BARRY, CHRISTIAN.) 2020

Central Asia and the Silk Road Stephan Barisitz 2017-04-28 This book offers a comprehensive overview of the pre-modern economic history of Central Asia and the Silk Road, covering several millennia. By analyzing an abundance of sources and materials, it illustrates the repeated economic heydays of the Silk Road, during which it linked the Orient and Occident for many centuries. Nomadic steppe empires frequently dominated Central Asia, molded its economy and influenced trade along the Silk Road. The book assesses the causes and effects of the wide-ranging overland trade booms, while also discussing various internal and external factors that led to the gradual economic decline of Central Asia and eventual demise of the Silk Road. Lastly, it explains how the economic decline gave rise to Chinese and Russian colonialism in the 18th and 19th centuries. Detailed information, e.g. on the Silk Road's trajectories in various epochs, is offered in the form of numerous newly drafted maps.

The Structure and Function of Aquatic Microbial Communities Christon J. Hurst 2019-05-13 This book discusses how aquatic microbial communities develop interactive metabolic coordination both within and between species to optimize their energetics. It explains that microbial community structuration often includes functional stratification among a multitude of organisms that variously exist either suspended in the water, lodged in sediments, or bound to one another as biofilms on solid surfaces. The authors describe techniques that can be used for preparing and distributing microbiologically safe drinking water, which presents the challenge of successfully removing the pathogenic members of the aquatic microbial community and then safely

delivering that water to consumers. Drinking water distribution systems have their own microbial ecology, which we must both understand and control in order to maintain the safety of the water supply. Since studying aquatic microorganisms often entails identifying them, the book also discusses techniques for successfully isolating and cultivating bacteria. As such, it appeals to microbiologists, microbial ecologists and water quality scientists.

Berkshire Encyclopedia of World History
William Hardy McNeill 2005 The Berkshire Encyclopedia of World History is the first true encyclopedic reference on world history. It is designed to meet the needs of students, teachers, and scholars who seek to explore -- and understand -- the panorama of our shared history of humans. Twelve Years A Slave, Illustrated Edition
Solomon Northup 2014-04-08 Kidnapped and sold into slavery in the American South, freeman Solomon Northup spent twelve years in bondage before being freed. Twelve Years a Slave is Northup's moving memoir, revealing unimaginable details of the horrors he faced as a slave on Southern plantations, and his unshakable belief that he would return home to his family. Written in the year after Northup was freed and published in the wake of Harriet Beecher Stowe's Uncle Tom's Cabin, Northup's story was quickly taken up by abolitionist groups and news organizations as part of the fight

against slavery, and continues to resonate more than a century after the end of the American Civil War.

Reference Guide to Christian Missionary Societies in China: From the Sixteenth to the Twentieth Century R.

G. Tiedemann 2016-07-01 This comprehensive guide will facilitate scholarly research concerning the history of Christianity in China as well as the wider Sino-Western cultural encounter. It will assist scholars in their search for material on the anthropological, educational, medical, scientific, social, political, and religious dimensions of the missionary presence in China prior to 1950. The guide contains nearly five hundred entries identifying both Roman Catholic and Protestant missionary sending agencies and related religious congregations. Each entry includes the organization's name in English, followed by its Chinese name, country of origin, and denominational affiliation. Special attention has been paid to identifying the many small, lesser-known groups that arrived in China during the early decades of the twentieth century. In addition, a special category of the as yet little-studied indigenous communities of Chinese women has also been included. Multiple indexes enhance the guide's accessibility.

Stuart Hall Kuan-Hsing Chen 2006-05-23
Stuart Hall's work has been central to the formation and development of cultural studies as an international discipline. Stuart Hall: Critical Dialogues in Cultural Studies is an invaluable collection of writings by and about Stuart Hall. The book provides a

representative selection of Hall's enormously influential writings on cultural studies and its concerns: the relationship with Marxism; postmodernism and 'New Times' in cultural and political thought; the development of cultural studies as an international and postcolonial phenomenon, and Hall's engagement with urgent and abiding questions of 'race', ethnicity and identity. In addition to presenting classic writings by Hall and new interviews with Hall in dialogue with Kuan-Hsing Chen, the collection, which includes work by Angela McRobbie, Kobena Mercer, John Fiske, Charlotte Brunsdon, Ien Ang and Isaac Julien, provides a detailed analysis of Hall's work and his contribution to the development of cultural studies by leading cultural critics and cultural practitioners. The book also includes a comprehensive bibliography of Stuart Hall's writings.

Surveying Antimicrobial Resistance: The New Complexity of the Problem Gilberto Igrejas 2020-07-10
In January of 2015, under the 1st International Caparica Conference in Antibiotic Resistance, a Research Topic entitled: "Surveying Antimicrobial Resistance: Approaches, Issues, and Challenges to overcome", was published

(<http://journal.frontiersin.org/researchtopic/3763/surveying-antimicrobial-resistanceapproaches-issues-and-challenges-to-overcome>). The problem of antimicrobial resistance (AMR), caused by excessive and inappropriate use of antibiotics, is a public health issue that concerns us all. The introduction of penicillin in the 1940s, the start of the antibiotics era, has been recognized as one of the greatest advances in therapeutic medicine. However, according to the World Health Organization (WHO), AMR infections are now an increasing worldwide public health threat and a post-antibiotic era is imminent, where common infections and minor injuries could be fatal. AMR is a typical 'One Health' problem, in which livestock animals and the

environment constitute AMR reservoirs and transmission routes to and from the human population. Without effective antimicrobials to counter and prevent infections, other major achievements in modern medicine, such as organ transplantation, cancer chemotherapy and major surgery, risk being compromised. AMR infections in animals have negative outcomes on animal health, welfare, biosecurity and production. In 2006, the ban of growth promoting antibiotics highlighted antibiotic use in animal production as a risk factor in the development of antibiotic resistant bacteria. Bacteria can be transferred to humans via several routes; consumption of animal products, exposure through contact with animals, and the contamination of ground and surface waters by animal waste products. Therefore, it is of utmost importance that antimicrobial use in animals is reduced to a minimum, without compromising animal health and welfare. Mechanisms of bacterial antibiotic resistance are classified according to the types of antibiotic molecules or their targets in the cell. Environmental antibiotic-resistance genes are spread then acquired by clinically relevant microorganisms. Many resistance genes are conveyed into pathogen genomes via mobile genetic elements such as plasmids, transposons or integrons, increasing the propagation of potential resistant pathogens. Substantial progress has already been made in elucidating the basic regulatory networks that endow bacteria with their extraordinary capacity to adapt to a diversity of lifestyles and external stress factors. So how will we face bacteria in the future?

Human Enhancement Drugs Katinka van de Ven 2019-07-02 Despite increasing interest in the use of human enhancement drugs (HEDs), our understanding of this phenomenon and the regulatory framework used to address it has lagged behind. Encompassing public health, epidemiology, neuroethics, sport science, criminology, and sociology, this book brings together a broad spectrum of scholarly insights and research expertise from leading authorities to

examine key international issues in the field of HEDs. As "traditional" and other "new" drug markets have occupied much of the academic attention, there has been a lack of scholarly focus on human enhancement drugs. This book provides readers with a much-needed understanding of the illicit drug market of HEDs. The authors, from a variety of cultural contexts, disciplines and perspectives, include both academics and practitioners. Topics explored in this collection amongst others include: • The anti-doping industry and performance and image enhancing drugs • Steroids and gender • The use of cognitive enhancing drugs in academia • The use of sunless synthetic tanning products • The (online) trade of HEDs • Regulations of the enhancement drugs market This collection will serve as a reference for students, academics, practitioners, law enforcement and others working in this area to reflect on the current state of research and consider future priorities. This detailed exploration will provide a valuable knowledge base for those interested in human enhancement drugs, while also promoting critical discussion.

The Economics of Quarantine and the SPS Agreement Kym Anderson 2012 The Uruguay Round of multilateral trade negotiations, culminating in the GATT Secretariat being transformed into the World Trade Organization (WTO) on 1 January 1995, has altered forever the process of quarantine policymaking by national governments. On the one hand, WTO member countries retain the right to protect the life and health of their people, plants and animals from the risks of hazards such as pests and diseases arising from the

importation of goods. On the other hand, the WTO's Agreement on Sanitary and Phytosanitary Measures (the SPS Agreement) requires that quarantine measures be determined in a manner that is transparent, consistent, scientifically based, and the least trade-restrictive. This collection resulted from an international workshop funded and organised by Biosecurity Australia, the agency of government responsible for analysing Australia's quarantine import risks and for negotiating multilateral SPS rules and less restrictive access to overseas markets for Australian produce. The workshop, which was held at the Melbourne Business School on 24-25 October 2000, brought together a distinguished group of applied economists and quarantine policy analysts whose focus involves regions as disparate as Europe, North America, Africa, Asia and New Zealand, in addition to Australia.

English Benedictine nuns in exile in the seventeenth century

Laurence Lux-Sterritt 2017-03-24 This study of English Benedictine nuns is based upon a wide variety of original manuscripts, including chronicles, death notices, clerical instructions, texts of spiritual guidance, but also the nuns' own collections of notes. It highlights the tensions between the contemplative ideal and the nuns' personal experiences, illustrating the tensions between theory and practice in the ideal of being dead to the world. It shows how Benedictine convents were both cut-off and enclosed yet very much in touch with the religious and political developments at home, but also proposes a different approach to the history of nuns, with a study of emotions and the senses in the cloister,

delving into the textual analysis of the nuns' personal and communal documents to explore aspect of a lived spirituality, when the body which so often hindered the spirit, at times enabled spiritual experience.

Reimagining the Higher Education Student
Rachel Brooks 2021-03-17 Drawing on the perspectives of scholars and researchers from around the world, this book challenges dominant constructions of higher education students. Given the increasing number and diversity of such students, the book offers a timely discussion of the implicit and sometimes subtle ways that they are characterised or defined. Topics vary from the ways that curriculum designers 'imagine' learners, the complex and evolving nature of student identity work, through to newspaper and TV representations of university attendees. *Reimagining the Higher Education Student* seeks to question the accepted or unquestioned nature of 'being a student' and instead foreground the contradictions and 'messiness' of such ideation. Offering timely insights into the nature of the student experience and providing an understanding of what students may desire from their Higher Education participation, this book covers a range of issues, including: Impressions versus the reality of being a Higher Education student Portrayals of students in various media including newspapers, TV shows and online Generational perspectives on students, and students as family members It is a valuable resource for academics and students both researching and working in higher education, especially those with a focus on identities, their importance and their constructions.
