Promotion and Tenure Confidential David D. Perlmutter 2010-11-15 "Sitting down with a young and brilliant mathematician, I asked what he thought were his biggest problems in working toward tenure. Instead of describing difficulties with his equations or his software programs, he lamented that (a) his graduate assistant wasn't completing his tasks on time, (b) his department chair didn't seem to care if junior faculty obtained grants, and (c) a senior professor kept glaring at him in faculty meetings. He knew he could handle the intellectual side of being an academic—but what about the people side? 'Why didn't they offer "Being a Professor 101" in graduate school?' he wondered." *Promotion and Tenure Confidential* provides that course in an astute and practical book, which shows that P&T is not just about research, teaching, and service but also about human relations and political good sense. Drawing on research and extensive interviews with junior and senior faculty across many institutions, David D. Perlmutter provides clear-sighted guidance on planning and managing an academic career, from graduate school to tenure and beyond. Topics include: making the transformation from student and protégé to teacher and mentor seeking out and holding onto lifelong allies how to manage your online reputation and avoid "death by Google" what to say and what not to say to deans and department chair show meeting deadlines wins points with everyone in your life how, when, and to whom to say "no" when and how to look for a new job when you have a job how (and whom) to ask for letters of recommendation what to do if you know you're not going to get tenure

An Ethic for Health Promotion David R. Buchanan 2000-01-20 What is the goal of public health promotion today? If the leading causes of mortality nowadays are primarily attributable to lifestyle behaviors, is the purpose of research to develop the power to change those behaviors, in the same way that science has been able to control infectious diseases? Or is the quest for effective behavior modification techniques antithetical to the idea of promoting well-being defined in terms of individual autonomy, dignity, and integrity. *An Ethic for Health Promotion* explores these questions.
